

# Earthkeepers Camp – Stage 2

## THREE DAY CAMP

This is a mystical old world ecology program that has the students entranced in mystery, discovery and ceremony for a three day camp. The program encourages a deeper connection and understanding of natural systems through exploration, story and a themed approach. Students will discover natural cycles and food webs, needs of plants and animals, evolution, sustainability and plenty of camp fun. There is a high literacy component and students will engage in many higher order thinking tasks.

Students entering the 'Earthkeepers Training Centre' at Brewongle will become apprentice Earthkeepers as they attempt to unlock the 'secret to the keys' and begin their journey to becoming Level One Earthkeepers.

This is a timeless and brilliant program that requires pre and post work in class. Students will complete their training back at school and receive further keys.

**Wildlife Presentation and Campfire:** An evening program that will involve discovering some of our incredible native animals.
